Project Synopsis

- 1800 square metres of Internal Burnished finish.
- 5000 square metres of external concrete

7000 Square Metres of Internal and External Concrete Paving

**Customer: Pipetech
South Australia**

Stokcrete have constructed a number of concrete floors. The scope on this project was to place and finish. The 1800 square metres of internal floor was completed in two days. The internal floor and some external paving was constructed with the Somero Laser screed achieving high levels of flatness. The finish was achieved with Allan ride on trowelling machines. Benefits of using the equipment are:

- Cost
- Speed of installation
- Minimal staff required for construction
- Less labour intensive for staff
- Higher levels of levelness and flatness
